PRESS RELEASE

THERMODYNE WINS GRANT FOR SECOND FIRE TEST FACILITY UNDER WOMEN'S ENTREPRENEURSHIP FUND

TORONTO, Canada, September 5, 2019 — Thermodyne Engineering Ltd. is pleased to announce that it has been selected as a proud recipient of a \$100,000.00 grant under the Government of Canada's Women's Entrepreneurship Funding Opportunity.

The grant from the will be allocated to the development and construction of a Second Fire Test Chamber within the company's existing laboratory. The new chamber will meet Thermodyne's growing demand for fire testing to ensure passenger safety.

"Aircraft safety is a top of mind issue for many Canadians," says Thermodyne President Rosemary Yeremian, "As new airplane designs come to the forefront, they need to be tested under fire conditions to ensure they are passenger worthy. Our second fire test chamber will increase Canada's capacity to be a leader in this critical sector."

The new chamber will ensure that any advanced manufacturing product meets and exceeds Transport Canada and U.S. Federal Aviation Administration requirements by testing them for fire resistance. It will simulate the exact condition of a fire in an airplane flying at high speed, under vibration, vacuum, high-speed air flow and applied load conditions.

Having a Second Fire Testing Chamber will make Thermodyne Engineering Ltd. one of the few companies in the world with this capability.

To receive more information about Thermodyne's fire testing capabilities, aerospace companies can visit us at www.thermodyne.ca

Since 1976, Thermodyne Engineering Ltd. has provided consulting engineering and qualification / certification testing services to a wide variety of markets.
